

STEAM Enrichment 2020-2021

We are excited to again offer a Tuesday/Thursday Science, Technology, Engineering, Arts, and Math (STEAM) Enrichment program for students enrolled in our Fours, Bridging, and Kindergarten classes. This is an optional add-on which will be from 9:00 – 11:30. The class is a very hands-on learning environment. It helps encourage children to think “outside of the box” to build and create things using ordinary materials available to them.

Children must be enrolled in our preschool or kindergarten program to participate in this enrichment class. The price for this program will be an additional \$140.00 per month.
